

## Specialized Cells

After reading pages 58-59, and using online research, complete the following :

Complete the following chart:

| Type of Cell             | Function in the Body | Description/Special features | Shape/Arrangement/Colour |
|--------------------------|----------------------|------------------------------|--------------------------|
| Cheek Cells              |                      |                              |                          |
| Blood Cells              |                      |                              |                          |
| Lymph node cells         |                      |                              |                          |
| Bone Cells               |                      |                              |                          |
| Voluntary Muscle Cells   |                      |                              |                          |
| Involuntary Muscle Cells |                      |                              |                          |
| Nerve Cells              |                      |                              |                          |
| Gland Cells              |                      |                              |                          |
| Sperm Cells              |                      |                              |                          |
| Fat Cells                |                      |                              |                          |
